* The first quarter of 2010 was a transition period as new reporting requirements were implemented. Retroactive data capture was not always possible so some of the counts are not categorized. ** As two quarters of data are missing for Pictou, the totals represent the total for the year and not the total of Q2 and Q4. Accordingly, the provincial total represents full year-end figures and not the sum of quarterly data.

For definitions of the health and behavioural categories, see: http://www.maddiesfund.org/Grant_Guidelines/Health_and_Behavior_Categories.html

* The first quarter of 2010 was a transition period as new reporting requirements were implemented. Retroactive data capture was not always possible so some of the counts are not categorized. ** As two quarters of data are missing for Pictou, the totals represent the total for the year and not the total of Q2 and Q4. Accordingly, the provincial total represents full year-end figures and not the sum of quarterly data. For definitions of the health and behavioural categories, see: http://www.maddiesfund.org/Grant Guidelines/Health and Behavior Categories.html

* The first quarter of 2010 was a transition period as new reporting requirements were implemented. Retroactive data capture was not always possible so some of the counts are not categorized.

The first quarter of 2010 was a transition period as new reporting requirements were implemented. Retroactive data capture was not always possible so some of the counts are not categorized.
** As two quarters of data are missing for Pictou, the totals represent the total for the year and not the total of Q2 and Q4. Accordingly, the provincial total represents full year-end figures and not the sum of quarterly data. For definitions of the health and behavioural categories, see:
http://www.maddiesfund.org/Grant_Guidelines/Health_and_Behavior_Categories.html
